What our customers say about us

Agile software product development enables us to capture early customer feedback to ensure our solutions is on target. We see a trend with IoT increased data analytics, increased number of servers to be able to process that data. The Persistent team is helping us to hack this growth by being more nimble in our 3D modeling technique.

Lorenz Hofmann

VP of Engineering, Thermal Management, Emerson Network Power

Software and technology have really changed how research staff and patients engage with each other. We use technology and data in a way that is transformative and our patients find it empowering. With Persistent Systems we are using Salesforce platform and have developed a research portal for our Indo-US research activity.

Amita Gupta

Associate Professor of Medicine, Johns Hopkins University

The movement of patients throughout a Healthcare system and also leveraging sensory data from inside houses, embedded along side patients and to collect this mass amounts of data from the Internet of Things (IoT) and link it to clinical and research records and be able to have an eco-system that is flexible enough to receive data from these multiple sources and find actual clinical interventions that save lives!

Tom Carton

Director of Health Services Research, Louisiana Public Health Institute (LPHI) REACHnet Principal Investigator
