

Appian for Healthcare Providers

PHYSICIAN SERVICES TRACKING

- > Simplify with single sign-on access and enhanced reporting views
- > Improve patient care review efficiency
- > Comply with internal policy, and federal and state requirements
- > Integrate with EMR systems and data

Tracking physician services is a cornerstone in efforts to improve care delivery and patient outcomes. Provider organizations are faced with a range of different incentive and quality improvement programs that can be difficult to navigate, yet must be managed for the best results.

How do you ensure that each patient is receiving optimal care and that all requirements, including Meaningful Use and ARRA, are being met?

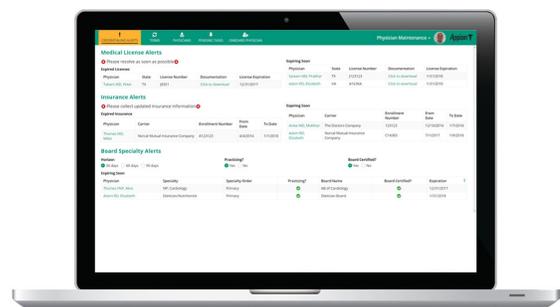

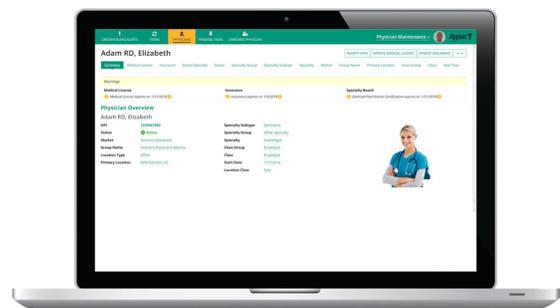

With an effective physician review process in place, each member of the care team is held to a high standard for clinical quality, and is provided with guidance to meet that standard.

MEET THE CHALLENGE

The first step to an effective clinical quality review process is having the right technology in place.

With Appian, clinicians have:

- An integrated 360 degree view for visibility to personally designed care plans
- Real-time information for access to patient needs, from current diagnosis to medical history
- Standardized reporting for measurable results
- Structured work streams for quality and compliance

Time Spent Dealing
with Quality Measures
per Physician:

15 Hours
PER WEEK

\$40,000
PER YEAR

FOCUS

Deliver key capabilities for effective Physician Services Tracking with an automated approach to patient safety and clinical quality.

- Establish compliance to clinical quality standards
- Enable adherence to best practices and evidence based medicine
- Empower Segregation of Duties
- Ensure HIPAA regulations are met

TAKE CONTROL

Quickly build, deploy, and scale governance and compliance initiatives with enterprise solutions for:

- Clinical Quality Review
- Facility Merger & Acquisition On-Boarding, Standardization, and Audit
- Pharmacologics Trackability
- Physician Reimbursement / MIPS Tracking
- Regulatory Compliance Coordination and Reporting

PREPARE FOR THE FUTURE

The future of healthcare depends upon the ability to quickly adapt and provide quality and convenience for providers, payers, and most importantly, patients.

It takes speed and power to deliver transformational healthcare solutions. The Appian low-code application platform provides both.

With Appian, organizations can build web and mobile apps faster, run them on a HIPAA compliant cloud, and manage complex processes, end-to-end, without limitations.

Appian is ideal for helping healthcare organizations rapidly leverage technology, while reducing cost and risk.

- PSHEALTH

Appian

Appian provides a leading low-code software development platform that enables organizations to rapidly develop powerful and unique applications. The applications created on Appian's platform help companies drive digital transformation and competitive differentiation.
