A Digital Transformation Platform for Healthcare

Does your healthcare organization need...

- Better: Faster, easier to use decisions
- Deeper: Extensive, comprehensive, and actionable information
- Mobile: Mobile apps for mobile on-the-go access
- More meaningful: Customer engagement

With the changing landscape of how organizations operate, it’s even more important that organizations incorporate technology in smarter, safer, and more predictable ways.

Powerful Capabilities That Simplify and Unify Healthcare

- Recall: Access information from across your entire organization
- Enterprise Mobility: Mobile apps for mobile on-the-go access
- Demo/Process : Create, test, and deploy applications on mobile devices
- Record: Deliver personalized experience based on patient needs and preferences

Improve decision making. Speed innovation. Simplify the healthcare journey.

Customer Experience
- Create cost-effective, personalized experiences to improve patient care

Operational Excellence
- Deliver high-quality, personalized care to patients

Regulatory Compliance and Quality Assurance
- Deliver high-quality, personalized care to patients

Appian’s digital transformation platform allows for rapid deployment that delivers results in weeks, not months.

Appian

Appian delivers innovative solutions for digital transformation in healthcare that enables providers and payers to improve engagement for their members, while significantly improving quality of care, patient experience, and operational outcomes. Appian’s low-code approach is built on cloud and APIs, allowing organizations to quickly deploy and scale solutions on a global scale. With Appian, healthcare providers can dramatically reduce the time it takes to deliver innovative, high-value solutions for their patients.
