

Appian for Healthcare Payers

HUMAN RESOURCE MANAGEMENT

- Achieve unified views of individual employees and groups
- Automate processes to save time and money and remain compliant
- Collaborate seamlessly across multiple systems
- Customize workflows for today's needs and tomorrow's innovations

For human resource managers, multiple systems and manual processes for recruiting, on-boarding, monitoring performance, and other tasks can result in redundant activities and wasted time. HR departments for health plans may also face security and compliance challenges managing clinical credentials and assigning employee permissions for care management, claims and other systems.

Furthermore, legacy systems often don't offer health plans the freedom to keep up with innovations in HR management. This hinders HR's ability to treat employees like valued customers and support them in their everyday jobs and career growth.

A UNIFIED PLATFORM FOR HUMAN RESOURCE MANAGEMENT IN ONE PLACE

Appian's low-code application development platform can build applications for every stage of the employee lifecycle, helping health plans support an agile and mobile-enabled workforce.

- **Automate tasks** for posting jobs, onboarding employees, assigning security permissions, and more
- **Streamline staff management** with integrated processes across multiple systems, self-service portals, and a unified view of individual employees
- **Stay current with data** consolidated into a single interface, updated in real time
- **Collaborate easily** with intuitive workflows you can customize to your organization's needs

FOCUS

Better serve management and staff with Appian's next-gen capabilities.

- Keep up with innovations and respond to employee needs with the flexibility to adapt
- Achieve compliance with top-notch security for separation of duties for the peace of mind that your employees' data is private and secure
- Eliminate duplicate data and time spent on manual tasks

TAKE CONTROL

Appian gives organizations the ability to quickly build, deploy, and scale enterprise healthcare corporate function applications for:

- IT and Application Service Management
- Digital Strategy and Innovation
- Procurement and Vendor Management
- Finance and Accounting Management
- Legal Matter Management
- Internal Customer Service-Technology
- Internal Customer Service-Employee & Benefits Management

PREPARE FOR THE FUTURE

The future of healthcare depends upon insurers' ability to quickly adapt and provide high-quality convenient services for providers, payers, and—most importantly—members.

Transformational healthcare solutions require speed and power. The Appian low-code application platform provides both.

With Appian, organizations can build web and mobile apps faster, run them on a HIPAA-compliant cloud, and manage complex processes end-to-end, with bots and without limitations.

HEALTHCARE ORGANIZATIONS TRUST APPIAN:

Appian

Appian provides a low-code development platform that accelerates the creation of high-impact business applications. Many of the world's largest organizations use Appian applications to improve customer experience, achieve operational excellence, and simplify global risk management and compliance.
