

# Intelligent Document Processing (IDP)

PROCESS LARGE VOLUMES OF DOCUMENTS, FAST

With Appian's Intelligent Document Processing, classify and extract data from documents faster than ever with fewer errors.

According to a survey by IDG and LTM, **86%** of executives said that humans, AI systems, and robots will need to be well-integrated with each other by the end of this year. However, only **12%** of these executives said their organizations do this well today.

## SET UP IN MINUTES

One of the quickest wins an organization can achieve today is to free up resources to focus on high-value tasks. Appian's Intelligent Document Processing (IDP), part of Appian's low-code automation platform, lets you use artificial intelligence (AI) to extract structured data from documents like invoices, application forms, and more.

Organizations traditionally would extract this information through slow, error-prone, and expensive manual data entry. To improve this situation and innovate, they are turning to AI.

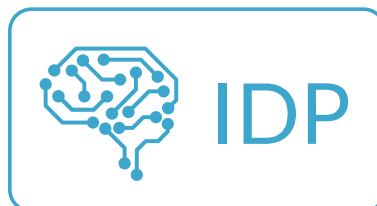

## HOW IT WORKS

Appian's industry-leading low-code automation platform makes it easy to automate manual processes, set up AI services, and train them to accept unstructured data. Appian also allows humans to be integrated back into the loop if AI services cannot extract data through automation. Human interactions, such as recategorizing an expense type, retrains the AI service, making it smarter over time. This workflow combines the best of both worlds and is ready to go fast. How fast? IDP setup takes a few minutes, training the model in a few hours. After that, IDP is ready to go.

ARTIFICIAL INTELLIGENCE

STRUCTURED DATA

*“We saw immediate value after implementing Appian’s IDP solution. By extracting data from thousands of legacy documents and linking it to Records within Appian, users now have access to critical data in seconds rather than hours or days.”*

- MATTHEW RICHARD, CIO - LiUNA

### WHEN SHOULD WE CONSIDER APPIAN IDP?

Any form that needs to get processed at high volumes is a candidate for IDP.

#### Examples include:

Invoices

Regulatory forms

Purchase orders

Insurance claims

Loan documents

Health records

#### Benefits include:

- ✓ Greatly improved processing times
- ✓ Significantly reduced data entry errors
- ✓ Scaling your workload without scaling your workforce
- ✓ Driving efficiency even in the absence of document standardization

### Where Can We Learn More?

IDP is available out-of-the-box with our low-code automation platform.

- Try out Appian IDP today with a free trial at: [appian.com/platform/free-trial](https://appian.com/platform/free-trial)
- Schedule a demo today and learn more at: [appian.com/company/request-a-demo](https://appian.com/company/request-a-demo)

# Appian

Appian provides a low-code automation development platform that accelerates the creation of high-impact business applications. Many of the world’s largest organizations use Appian applications to improve customer experience, achieve operational excellence, and simplify global risk management and compliance.
