As productivity requirements rise and organizations face expanding backlogs of integration needs, RPA can be strategically implemented to automate repetitive tasks and connect systems in frictionless workflows to simplify business.

Appian RPA is a cloud-native technology for robotic task automation that **increases efficiency, reduces errors, and lowers costs**. Appian RPA is part of Appian’s full-stack automation, which combines RPA, workflow, decision rules, AI, and case management, giving you the right technology for the right use case.

**Appian RPA key features:**

- **Powerful Governance:** Centrally manage, monitor, and deploy bots across the organization to increase scale and performance.

- **Secure, Cloud RPA:** Simplify access and adoption of RPA across Appian’s globally available and highly secure cloud.

- **Dynamic Exception Handling:** Best-in-class human-in-the-loop capabilities to handle exceptions and ad-hoc activities.

- **Robust Java Development:** Provide developers greater control to create sophisticated bots that can handle even the most complicated tasks.

**LiUNA!**

Appian RPA as part of a unified automation stack delivers the speed and scalability we need.

Matt Richard, CIO
Laborers International Union of North America (LiUNA!)
Extend automation throughout the enterprise.

- **Deployment Flexibility**: Create unlimited bots and deploy in both Windows and Linux environments, optimizing the cost of operating a digital workforce.
- **Detailed Audit Trails**: Complete visibility into every RPA process and action for control and optimization of your digital workforce.
- **Self-Service Execution**: Bots can be executed on-demand, providing increased productivity for business users and greater ROI for your organization.
- **End-to-End Automation**: Powerful process orchestration, exception-handling, and integration capabilities enable end-to-end business process automation — and bigger business impact.
- **Optimize Business Processes and Identify Process Improvement Opportunities**: Analyze robot and process data to uncover bottlenecks or identify digital workforce optimization opportunities.
- **Centrally Manage ALL Automation**: With Appian RPA, you also receive Appian Robotic Workforce Manager — manage Appian bots and process automation, as well as third-party RPA bots across the enterprise.

Appian provides a low-code automation platform that accelerates the creation of high-impact business applications. Many of the world’s largest organizations use Appian solutions to improve customer experience, achieve operational excellence, and simplify global risk management and compliance.
