Modernize Your Agency’s Procurement Process

Are you making key decisions based on outdated systems?

After just a short time, most eProcurement systems become difficult to use and challenging to update, which renders them obsolete. Users become frustrated, hampered by slow decision-making and the burden of bureaucracy, despite technology that was supposed to help. Most of today’s technology offerings for these systems have not kept up with the pace of change.

Enter Appian.

Appian for eProcurement modernizes what is often a disjointed process, especially within state and local government agencies. Appian unifies and automates all aspects of the procurement process and is easily configurable to any agency’s unique requirements for contract writing, requirements management, award management, vendor selection, and automated terms and conditions. With Appian, you can deliver on the promise of convenience and compliance all from within a single application that eliminates the need to hop back and forth between multiple systems.

- Reduce training requirements with an easy-to-use interface.
- Integrate data from various systems, removing the need to “rip and replace.”
- Automate repetitive tasks with Appian RPA and AI.
- Speed configuration with graphical “drag-and-drop” design tools.

Appian for state and local agencies.

Appian delivers a platform for state and local agencies that unifies powerful capabilities:

- **Business process management**: Reap the benefits of the leading platform for BPM.
- **Dynamic processes**: Handle dynamic and ad hoc contract management processes.
- **Complete information**: Unify all information on any topic and view it in a single, drillable report.
- **Business rules**: Create and manage business rules to quickly adapt to evolving policies.
• **Collaboration:** Take advantage of the brain power of your workers with social collaboration that uncovers new insights.

• **Agile delivery:** Simplify implementation with flexible deployment and integrations.

• **Low-code:** Use drag-and-drop, point-and-click design to launch applications, fast.

### Focus on eProcurement.

- eProcurement package creation
- eProcurement RPA bots
